Health and Housing

RiverLink Sustainability Wheel ~ We want you to BE THERE

Balance in protection and progress, in art and industry that fosters
Economic development, for mixed-income housing, business and art activity, plus new
Transportation around and through town, along with new places for
Health and wellness and housing for all incomes. The plan will assure
Environmental safekeeping of our French Broad and Swannanoa Rivers, plus more space for
Recreation, including biking, hiking, paddling, and sports of all kinds, and
Education, to empower us all to be good stewards and guardians of our precious rivers.
