

## What color is water?

by: Gennie Bassett

What color is water?

green,  
blue,  
black,  
silver,  
gold,

Water is the color of a sunset  
the color of the mountains,  
the color of a blue sky  
water is the color of a black night and a silver star,  
water is color, for everyone it is different,  
grass green,  
sky blue,  
midnight black,  
shining silver,  
gleaming gold,

Water is the color of the sun or the moon  
the color of diamonds sparkling in the morning light,  
the color of an evening sky  
water is the color of a lake,  
what color is water?  
water is the color of the sky on the ground  
the color of the ocean,  
the color of a waterfall  
the color of a flying bird,  
water is all colors,  
emerald,  
periwinkle,  
sepia,  
silver,  
timberwolf,  
violet,  
gold,  
scarlet,  
dandelion,  
melon,  
tan,  
water is the color of your reflection,  
water is the color of life.
